Topnir Systems Receives Two Awards from Hydrocarbon Processing

**Topnir named best Modeling technology
CEO Didier Lambert honored with Lifetime Achievement Award**

Aix en Provence, France, October 12, 2022 – Topnir Systems, a provider of a unique unmatched technology using Near Infra-Red (NIR) analysis announced today that it has won two Awards from Hydrocarbon Processing (HP). Topnir Systems modeling software won the award for Best Modeling Technology. Didier Lambert, Topnir President, and CEO captured the Lifetime Achievement Award.

The 2022 HP Awards recognizes the midstream and downstream processing industry's top innovations and innovators encompassing the latest technological advances in the hydrocarbon processing industry.

Didier Lambert, Ph.D., Doctor in Sciences, is Chairman, CEO, and founder of Topnir Systems Company. He has over 30 years of experience in Refining and Petrochemicals, including International Project Management and Business Development through various Management positions at BP and ABB Group. Didier is the inventor of more than 30 patents and the recipient of the 1989 Petroleum Engineer's Award for Octane Number prediction by NIR.

Topnir is the leader of Near Infra-Red (NIR) analysis in Advanced Solutions for Oil and Refining Process Control. Offering turn-key systems and unmatched expertise with an outstanding track record. Providing you the extensive value of NIR analysis with quality and precision you can rely on, they pride themselves in their performance and offer you the highest level of service and support.

With more than 25 years of business experience worldwide alongside every major Oil & Gas Company, Topnirs' skills and expertise in NIR systems and modeling have led to an extensive and diverse install base with the delivery of more than 150 applications and 30 patents.
